Postgraduate Prospectus 2026–2027

## Welcome to Riverbend University — Postgraduate Programs

Riverbend University offers 8 postgraduate programs designed for graduates seeking specialised, research-informed education across technology, business, and the sciences. This prospectus outlines programs, eligibility, duration, and fees for prospective postgraduate students.

## Programs Offered

| Program                                 | Duration | Min. Bachelor's CGPA / %             | Annual Tuition Fee |
|-----------------------------------------|----------|--------------------------------------|--------------------|
| MSc Data Science                        | 2 years  | 6.0 CGPA / 60%                       | \$7,200            |
| M.Tech Computer Science                 | 2 years  | 6.5 CGPA / 65%                       | \$7,800            |
| Master of Business Administration (MBA) | 2 years  | 6.0 CGPA / 60%                       | \$9,500            |
| MSc Artificial Intelligence             | 2 years  | 6.5 CGPA / 65% (CS/Maths background) | \$8,200            |
| MA Economics                            | 2 years  | 5.5 CGPA / 55%                       | \$5,600            |
| MSc Biotechnology                       | 2 years  | 6.0 CGPA / 60%                       | \$6,800            |

## General Eligibility Criteria

Applicants must hold a recognised Bachelor's degree in a relevant discipline. **The standard minimum eligibility baseline for a first-pass automated check across postgraduate programs is a CGPA of 6.0 (equivalent to 60% aggregate).** Program-specific thresholds shown in the table above take precedence, and profiles close to the cutoff are reviewed manually by the Admissions Office.

MSc Data Science and MSc Artificial Intelligence additionally require a bachelor's degree background in Computer Science, Mathematics, Statistics, or a closely related quantitative discipline. Applicants from other backgrounds may be considered with relevant professional experience, subject to interview.

MBA applicants require a minimum of 1 year of full-time work experience by the program start date; candidates without work experience may still apply and will be considered for the Early-Career MBA track.

## Application Process

### Step 1 — Submit Online Application

Complete the postgraduate application form and upload transcripts, a statement of purpose, two reference letters, and (for MBA applicants) a resume.

## **Step 2 — Eligibility Review**

Applications are reviewed against program-specific CGPA/percentage and background requirements. A preliminary eligibility check is available through the Admissions agent by providing your highest qualification and score.

## **Step 3 — Interview / Written Test (where applicable)**

MSc Artificial Intelligence and MBA applicants are shortlisted for a written test and/or interview before a final admission decision is made.

## **Step 4 — Offer and Enrolment**

Offer letters are issued with an acceptance deadline and enrolment deposit. Application status can be tracked at any time with the reference number provided at submission.

## **Fees and Scholarships**

Tuition fees are billed per semester and due within 30 days of the start of each semester.

### **Graduate Merit Scholarships**

Postgraduate applicants with a CGPA of 8.0 or above (or equivalent 80%+) qualify for a 50% tuition scholarship for the duration of the program, subject to maintaining a minimum semester GPA of 7.0. Research assistantships covering partial tuition and a monthly stipend are available for MSc and M.Tech students supporting funded faculty research projects. Details and applications are available through the scholarships application portal linked from the Admissions FAQ.
